

PROJECT FLOW

Date	08 October 2022
Team ID	PNT2022TMID42265
Project Name	Early Detection of Chronic Kidney Disease Using Machine learning
Maximum Marks	2 Marks

Following are the steps which are to be completed to complete this project:

Step-1:

- **Download & Save the data set.**

Step-2:

- **Data preparation or cleaning the data set.**

Step-3:

- **Examine the previously processed data .**

Step-4:

- **Save the model and its dependencies .**

Step-5:

- **By training the system with preprocessed data and an appropriate machine learning technique.**

Step-6:

- **Create an integrated Web application with flask that works with the model you generated.**
