

## PROJECT OBJECTIVES

Date	08 October 2022
Team ID	PNT2022TMID42265
Project Name	Early Detection of Chronic Kidney Disease Using Machine learning
Maximum Marks	2 Marks

### By the end of this project:

- You'll be able to determine whether the classification challenge is a regression problem or another type of problem.
- You will be able to understand the various data pre-processing approaches and how to pre-process/clean the data.
- Through visualisation, you can examine or gain new insights from data.
- Utilising various methods in accordance with the dataset.
- You will be able to determine how to assess the model's correctness.
- Using Flask, you'll be able to create web applications.
- You'll be able to learn how to use the Flask framework to create a web application.
